Re: USA vs. 515 Concord Ave (Robert Clarkson), Docket # 8:07-cr-0536

Dear Agent Andy:

Our groups have no disputes with the FBI as you well know. We advocate serious tax reform and naturally meet resistant from the emmples from the tax beccrattariis. I merely use the IRS as a wiping post as I cope with the trauma of my war time experiences.

Finally you did not return to me my mementos and ____ - that I brought home from me in South East Asia these are classified as war trophies and I have a legal right to keep hem in my home even though they have the appearance of something I'm no suppose o have. I like to show these interested people. This helps me in my recovery from traumatic events and they mean a lot to me. I earned the hard way the right to display these items.

Your FBI agents seized the Patriot Network inventory of books and videos to harass and burden a political organization. You had no legitimate law enforcement purpose for the search warrant. You agency wanted to destroy a political organization which the FBI had determined was wrong. However, you have no authority under the law or regulations neither to make such a determination nor to attack political organizations. The Patriot Network is protected by the First, Ninth and 10th Amendments of the US Constitution.

As you know, the case in Greenville is over. The Judge issued an injunction against me that halted me from doing those activities which the court determined were incorrect. Since the federal judge has made a determination, the FBI does not need to make one. Apparently the FBI feels that the federal judges are incompet and do not know how to carry out their lawful functions.

Those activities which you disagree with were subject to the DOJ original petition for injunction against the PN. However, the DOJ withdrew most of their objections to my activities. Your agency is attacking me for the same activities that the government attorneys considered not wrongful. Apparently the FBI also feels that the DOJ Attorneys are incompetent and do not know how to carry out their functions.

Incidentally, the federal Judge and the Department of Justice have statutory authority from Congress to enjoin business organizations dealing with taxes. FBI has no authority whatsoever for their action against me.

As your people have probably told you, this case is headed toward litigation. Your actions will soon be scrutinized by the federal judiciary. Also, I have a right for damages under the Privacy Act, the Civil Rights Act, etc. If you desire to resolve this case administratively, return my property and have your attorney contact me.

As you saw in the news-media, the FBI in Boston just paid out over a million \$\$\$ in damages, plus receiving adverse publicity.

Enclosed is a copy of a cartoon and copies of US Dollars used as a religious track by some church organization. Please go arrest those folks!

Yours,

Robert Clarkson

Re: USA vs. 515 Concord Ave (Robert Clarkson), Docket # 8:07-cr-0536

Dear Agent Andy:

If anything in this description of these events is incorrect, please let me know within 10 days. If you do not disagree in writing, I can assume that you in fact agree with these events in this letter.

Please find enclosed a copy of a "fraudulent event note" This is a political track that looks very similar to the US dollar. This is clearly a banking instrument related to your investigation. The political group claims this is "one deception" they are using this against the interest of the US government. However, they clearly list their name and address so you can go out there and arrest them. You have a much better case against them than me so please arrest them as soon as you can!

Apparently a number of political groups are using facsimile to the US currency as a tool to disassemble their ideas.
